

ImageWeb

Flexible image distribution within the healthcare facility

- Simple and quick availability to examinations throughout the entire facility
- On demand access to every workplace in the network
- Images and results can be called upon in seconds through intelligent compression
- DICOM images are displayed in high quality (support of the full bit depth and resolution)
- Extremely easy to use and manage
- Individually definable access regulations (optional)

DIGITAL IMAGES ARE OUR WORLD

In every work place connected to the network, medigration ImageWeb allows you access quickly and easily images within the healthcare facility. All basic functions for viewing images and results (windowing, zoom, inverting, rotation, annotation) are available in a quality you would expect. Thanks to current web technology, no complex installation is necessary.

Individual work flow oriented handling

Use our wide range of configuration options for your ideal result workflow. Taking your available bandwidth into consideration, determine the resolution in which images should be displayed as standard. With the push of a button, you can upload all images in their original quality at any time. The interpolation can also be set according to your personal requirements. Furthermore, medigration ImageWeb allows you to view various coloured image formats (ultrasound images, images for nuclear medicine, etc) in outstanding quality!

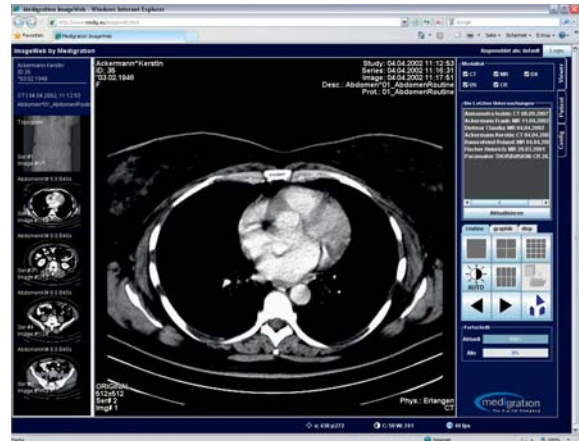

Upgrade Options:

Security module

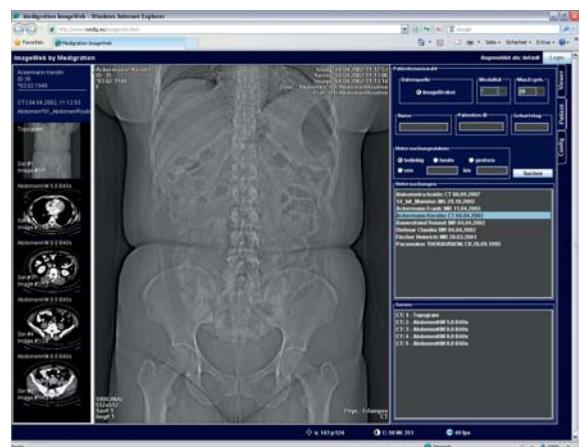

Our security module regulates the access rights for WebViewing and ensures that all patient information is immediately available for authorised personnel. The ward-oriented access controls allow patient studies to be assigned to selected wards. Individually set user profiles guarantee optimal protection of sensitive patient data.

HIS integration

Implementing valid user interfaces ensures a high capability to integrate with pre-existing hospital information systems. Use the possibility of accessing images in an automated manner from your HIS within the ImageWeb browser application.

Ergonomic user interface

Integrated patient search mask

Coloured images are displayed in exceptional quality
